

BOMAG Stabilizer RS 460

RS 460

Horsepower	456 HP
Operating Weight in Lbs.	53,352
Emission stage	Stage V / TIER4f

BOMAG recyclers are highly versatile

BOMAG soil stabilizers and recyclers are the perfect solution for every job site. From car parks and roads to landfill and dike construction, industrial sites to motorways, railways, and airports. Copes with the most varied fields of application, such as crushing asphalt, soil stabilization, or cold recycling.

Features & Benefits

Maximum safety with outstanding all-round visibility

The standard ROPS/FOPS cabin has large windows for the best panoramic view.

Greater efficiency and less maintenance

Hydraulic-mechanical rotor drive

Easy maintenance

The hood opens fully and effortlessly. To make maintenance as easy as possible, the engine and all service points are easily accessible from the ground.

Maximum range

High-capacity fuel tanks for long working shifts

Powerful traction

Three hydraulic motors, two single front drives, and a NoSPIN® rear axle make for effortless forward propulsion.
