

Caterpillar 3300 & 3400 Series Kits

3300 – 4- & 6-Cylinder Engines | 3400-6, 8-, & 12-Cylinder Engines

PPS provides Caterpillar 3300 and 3400 Series overhaul components that are manufactured to OE specifications by OE manufacturers. Our top priority is to deliver solutions that meet the needs of our customers.

One example is our state-of-the-art packaging. Each kit is packaged in a custom container sized for optimal usage.

We use CNC-formed foam layers to transport and stage each component securely. The components are packaged logically, from top to bottom, to flow efficiently with typical overhaul work scopes. The containers are marked with corresponding part numbers and are palletized for safe handling.
