

# Full Service & Rebuilds

3300, 3400, 3500, and 3600 Series Engines

3516 JEF on Dyno

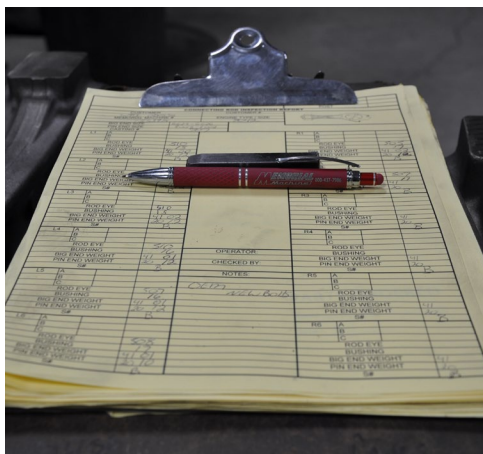

Pearce Power Solutions offers custom overhauls by a team of Tier 1 service technicians.

Whether performed in the field or in one of our strategically located service centers, you can expect high-quality service.

In case of time constraints, PPS can provide access to a vast inventory of exchange engines. We can provide all engine models within the 3300, 3400, 3500, and 3600 natural gas series.

Overhauls performed in our Houston Reman Center and Spruce Grove Service Center are tested on in-house dynamometers.

Results of all dyno tests are recorded, and customers are provided with corresponding reports.

Pearce Power Solutions™ is WPI's CAT® Parts Aftermarket Brand.

We provide cost-effective solutions to maintain and optimize your Caterpillar® engines.

WPI is committed to maximizing productivity and uptime by collaborating with OEMs and the most renowned names in after-market parts manufacturing.
