

# TimberPro Harvester TL725D

## TL725D

Swing Torque	57,800 ft lbs
Lift Capacities Harvester	30' 6,300 lbs
Performance	338 HP & 1,126 ft lbs
Tractive Effort	68,629 lbs

The TimberPro D-Series has been fitted with a new larger cab that has improved visibility both out the front of the cab and the boom side. Also now equipped with High Output LED lighting that will increase nighttime visibility in both the work area and directly under the cab to illuminate the tracks. The last major refinement of the cab would be adding a digital climate control system to keep the cab temperature steady and comfortable.

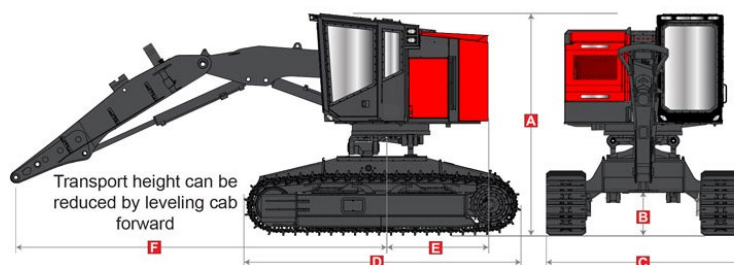

## Features & Benefits

### Engine

The Cummins L9 Performance Series Stage V engine contains an EGR-free architecture and compact Single-Module™ treatment system. Because of the reduction in the size of the emissions components, we were still able to meet all the requirements of Tier 4 Final and increased the horsepower and torque rating. However, we could keep an almost zero tail swing design.

The new L9 engine also boasts increased fuel economy and longer maintenance intervals over the previous models that will contribute to a reduced cost of operation and lower overall Total Cost of Ownership.

### Leveling

A	12' 5" (3.78 m)	D	15' 4" (4.67 m)
B	28.5" (72.4 cm)	E	5' 9" (1.76 m)
C	10' 4" (3.15 m)	F	23' 9" (7.23 m)
